Our neighbor reross

After New York and Philadehol in comes a group of six cities which each erreted in 1889 between 4000 and 5000 new buildings. These are Chicago, Brooklyn, Boston, Minneapolis, Washington and Cleveland, and the subjoined table shows just bow they tery ectively built .-

Here the differences are quite as strik ag ago by the Democrats so as to crowd the as that between New York's e astruct on bulk of the colored vote into one district, and Philadelphia's. Boston comes next and thus give the Democrats all the other to this town in the character of the averabout 1:0 more houses than Monean ilia. elected regardless of it e immense Republican majority in the district. new houses were built are three that come within or almost within the metropolitar circle, and they show a remarkal le close ness in their averages:
